DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I – implantable cardioverter-defibrillator of Figures 1-3

Species II – implantable cardioverter-defibrillator of Figures 12-13

Species III – implantable cardioverter-defibrillator of Figures 14-15

Species IV - implantable cardioverter-defibrillator of Figures 19-21

Species VI - implantable cardioverter-defibrillator of Figure 23A-23B

Species VII - implantable cardioverter-defibrillator of Figure 24A –24C

Species VIII - implantable cardioverter-defibrillator of Figure 25A-25B, 27

Species IX - implantable cardioverter-defibrillator of Figures 26A-26C

Species X - implantable cardioverter-defibrillator of Figure 28.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Restriction between the ICD species comprising a ceramic housing, the ICD species comprising a titanium alloy housing, the ICD species comprising a stainless steel housing, and the ICD species comprising a polymeric housing are considered clearly unpatentable over each other, therefore restriction between those species is not required.

Restriction between the species shown in Fig. 23A, and the species in Fig. 23B are considered clearly unpatentable over each other, therefore restriction between those species is not required.

Restriction between the species shown in Fig. 24B, and the species in Fig. 24C are considered clearly unpatentable over each other, therefore restriction between those species is not required.

Restriction between the species shown in Fig. 25A, the species in Fig. 25B, and the species shown in Fig. 27 are considered clearly unpatentable over each other, therefore restriction between those species is not required.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3762

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kristen L Droesch whose telephone number is 703-605-1185. The examiner can normally be reached on M-F, 8:00 am - 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angie Sykes can be reached on 703-308-5181.
